github.com/jmdmanalo2222

CORE SKILLS

Frontend

HTML, CSS, JavaScript, React; responsive interfaces and browser testing.

Backend

PHP, Node.js, Express, REST APIs, MySQL and phpMyAdmin.

Technical SEO

Metadata, structured data, internal linking and performance.

Delivery

Git, GitHub, debugging and website deployment.

PROFILE

Web developer focused on useful, responsive websites and the technical details that support them. Comfortable working across interfaces, content templates, server-side features and search foundations.

EXPERIENCE

Web Developer

Private company / Contract / Remote

2022 - Present

- Build and maintain responsive web pages using HTML, CSS, JavaScript, PHP and MySQL.
- Migrate content into approved templates while preserving navigation, scripts and mobile behavior.
- Improve page metadata, structured data, internal links and loading performance.
- Support learning-platform workflows including lessons, payments, student progress, audio and support features.

PROJECT INTERESTS

Interactive portfolios, booking flows, quote builders, product interfaces, dashboards and practical content tools.
